1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, drawn to a breath simulator device for checking the system functionality of a breath test instrument.

Group II, claim(s) 3-19, drawn to a calibration checking device comprising a porous tube and a breath tester incorporating a calibration checking procedure.

Group III, claim(s) 20, drawn to a method of calibrating a breath tester comprising performing a calibration check using two gases of a known isotopic ration difference between them.

Group IV, claim(s) 21-48, 61-63, and 66, drawn to a calibration checking device for use with a gas analyzer comprising a calibration checking unit.

Group V, claim(s) 49-56, drawn to a calibration checking device for use with a gas analyzer comprising a delivery conduit.

Group VI, claim(s) 57-60, drawn to a kit for calibration checking a gas analyzer comprising calibration checking units and disposable sampling tubes.

Group VII, claim(s) 64 and 65, drawn to a breath bringer, which changes a characteristic during use.

A telephone call was made to Peter Ludwig on September 16, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application.
